Loving Music Till It Hurts William Cheng 2019-10-01 Can music feel pain? Do songs possess dignity? Do symphonies have rights? Of course not, you might say. Yet think of how we anthropomorphize music, not least when we believe it has been somehow mistreated. A singer butchered or mangled the "Star-Spangled Banner" at the Super Bowl. An underrehearsed cover band made a mockery of Led Zeppelin's classics. An orchestra didn't quite do justice to Mozart's Requiem. Such lively language upholds music as a sentient companion susceptible to injury and in need of fierce protection. There's nothing wrong with the human instinct to safeguard beloved music . . . except, perhaps, when this instinct leads us to hurt or neglect fellow human beings in turn: say, by heaping outsized shame upon those who seem to do music wrong; or by rushing to defend a conductor's beautiful recordings while failing to defend the multiple victims who have accused this maestro of sexual assault. Loving Music Till It Hurts is a capacious exploration of how people's head-over-heels attachments to music can variously align or conflict with agendas of social justice. How do we respond when loving music and loving people appear to clash?

The Great Influenza John M. Barry 2005-10-04 #1 New York Times bestseller "Barry will teach you almost everything you need to know about one of the deadliest outbreaks in human history."—Bill Gates "Monumental... an authoritative and disturbing morality tale."—Chicago Tribune The strongest weapon against pandemic is the truth. Read why in the definitive account of the 1918 Flu Epidemic. Magisterial in its breadth of perspective and depth of research, The Great Influenza provides us with a precise and sobering model as we confront the epidemics looming on our own horizon. As Barry concludes, "The final lesson of 1918, a simple one yet one most difficult to execute, is that...those in authority must retain the public's trust. The way to do that is to distort nothing, to put the best face on nothing, to try to manipulate no one. Lincoln said that first, and best. A leader must make whatever horror exists concrete. Only then will people be able to break it apart." At the height of World War I, history's most lethal influenza virus erupted in an army camp in Kansas, moved east with American troops, then exploded, killing as many as 100 million people worldwide. It killed more people in twenty-four months than AIDS killed in twenty-four years, more in a year than the Black Death killed in a century. But this was not the Middle Ages, and 1918 marked the first collision of science and epidemic disease.
