High and Mighty Keith Bradsher 2004-01-19 SUVs have taken over America's roads. Ad campaigns promote them as safer and "greener" than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In High and Mighty, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect--for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of Unsafe at Any Speed and Fast Food Nation, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not.

And Now I'm Ready Kerry O'Brien 2016-01-12 I have been trying to write this book for years on and off, share my life with others, hoping to make a difference. So much of what has been dear to my heart, what has shaped me as a woman, an activist and a medium is in here. If I can help you to think about our world, her people and her animals and want the best for all of us, then this book will have done it's work. It's all about timing, and I wasn't ready to share so much of myself before, but now I am. It's time for all of us to step up and help mother earth and all her beings, before it really is , too late.

The place Yazoo City, Mississippi. One of the issues, the court-ordered desegregation of the public schools. The antagonists, the school officials. When the civil rights movement intensified in the South, circa 1954, white political leaders who believed in and practiced the ideology of "white supremacy" worked in concert to reverse the direction integration was heading in America. In 1970, some sixteen years out from the U.S. Supreme Court's Brown V. Board of Education of Topeka decision, we were still trying to get bigots to obey the law of the land. In a letter dated August 13, 1971, then U.S. Senator Walter F. Mondale (later Vice President Mondale) wrote: Dear Mr. Ward: I have received your recent letter describing the explosive situation in the Yazoo City. I certainly share your concern that unless the discriminatory treatment of black students in the Yazoo City school system is eliminated, the opening of school in September may be a most serious occasion. I have referred your concern to both the Justice Department and the Department of Health, Education and Welfare requesting their investigation and corrective action. In The Principal of the Matter, Eugene "Harry" Ward unfurls the calculated practices of de jure and de facto segregation, separation of the races that was supposedly equal under the "law" and "as a matter of fact."

Blindspot Janyce Helen Van Es 2005-04-01 Do we really know and understand our pets? Are we totally aware of their personalities and their habits, good and bad, even when we aren't around to observe them? Of course not! How could we? The neighbors tell us that our sweet little dog just trashed their yard with the garbage bag, or their cat is afraid to go outside. Well, what if a pet's main caretaker dies, and he/she is left to fend for him/herself? Blindspot is a blind Australian shepherd who loves his owner unconditionally, as expected. Unintentionally, she fails to realize all his needs when it comes to health and well-being, causing the dog to find his own meals, and he does, in animal and human flesh. Creating an overall panic and disruption in a small town in Texas, a Native American widow, Nelda Cannon, is totally unaware of her dog's eating habits. When she learns that he is suspected of murder, and it is her responsibility to be aware of what he does, she literally goes underground to protect him and herself. This story is not only focused on a misunderstood, hungry dog. It also raises some issues about the plight of the Native Americans, and their entitlements to land and privacy, the questions concerning the capture and elimination of endangered species if they are dangerous to mankind, and focuses on the loyalty of one family through hard and difficult times. A chain of strange circumstances follow for Nelda Cannon and the dog's benefit, leaving the reader totally amazed or perplexed in the ending of this story.

Marginalised Communities in Higher Education Neil Harrison 2021 "Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"-- Yeh-Shen, the Toad Bridegroom Karen Phelps 2009-01-01 Will poor, kindhearted Yeh-Shen get to the spring festival?
