"I Love You More Than My Dog" Jeanne Bliss 2009-10-15 Hundreds of businesses have customers who admire them, but only an elite few have true advocates—passionate, loyal, vocal fans—who rave about them to anyone who will listen. Jeanne Bliss, who served as a senior customer executive at five major companies, says there's no shortcut to becoming beloved—you can't hire a fancy marketing firm to get there. You earn it by how you decide to run your business—as Wegman's and Harley-Davidson have for decades and as relatively new companies like Zipcar and Zappos are doing right now. After studying and working with dozens of beloved companies, Bliss has identified five key decisions that lead to customer devotion: • Decide to believe • Decide with clarity of purpose • Decide to be real • Decide to be there • Decide to say "sorry" Her examples and advice will help readers sustain growth and profit even in a tough economy.

Chief Customer Officer Jeanne Bliss 2011-01-06 Drawing on her first-hand experience at top companies as diverse as Lands' End and Microsoft, Jeanne Bliss explains why even great corporations can drift to delivering mediocrity to customers, and she offers a proven solution to break the cycle. Different divisions and departments in corporations can fail to communicate and act as a team—they create silos instead of a superior customer experience. Jeanne Bliss shows in stark detail how profits suffer when businesses focus on their organizational charts and not their customer relationships. This book provides leaders the tools and

information they need to overcome organizational inertia and deliver a meaningful customer experience. The author includes diagnostics to determine if a company's core strengths, metrics, and systems improve or harm customer relationships. With all these tools, leaders can address the organizational challenges they face with an exhaustive review of the Chief Customer Officer role and an evaluation to determine the right solution for their culture and company.

Tall Life Dr Sam Lochner Phd 2016-05-24 This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that

giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.

The First Mile Scott D. Anthony 2014-04-01 You have a great idea, now what? That first mile—where an innovation moves from an idea on paper to the market—is often plagued by failure. In fact, less than one percent of ideas launched by big companies end up having real impact. The ideas aren't the problem. It's the process. The First Mile focuses on the critical moment when an innovator moves from planning to reality. It is a perilous place where hidden traps snare entrepreneurs and roadblocks slow innovators inside large companies. In this practical and enlightening manual, strategic adviser Scott Anthony equips innovators with new tools, questions, and examples to speed through this crucial early stage of innovation. You'll learn:

- How to evaluate your idea's strengths and weaknesses using the "DEFT" process—Document, Evaluate, Focus, and Test
- Fourteen recipes from an "experiment cookbook" to gain confidence in your idea or business
- Why "spinouts," "wrong turns," and other challenges commonly trip up innovation—and the practical strategies you can use to avoid them
- Why innovators need to seek chaos in an age of constant change—and other essential leadership skills

Drawing on his decade of experience as an innovation adviser and investor, Anthony describes hard-won lessons from disruptive start-ups and

global giants alike. The First Mile will give you the knowledge and confidence to travel this perilous—but ultimately promising—terrain. The first mile can be a scary place, but you don't have to traverse it alone. This book can help.

Lemon-Aid Used Cars and Trucks 2012–2013 Phil Edmonston 2012-05-19 Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

The Yugo Jason Vuic 2011-03-01 Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the

decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

Caterham Sevens Chris Rees 2005-08-28 Caterhams are a new take on the classic Lotus Sevens and are found on racetracks and twisty roads around the world. Caterham Sevens is the story of a former Lotus dealer, Graham Nearn, who saw the potential of a hand-built sportscar which its creator, Lotus founder Colin Chapman, was about to discard. Nearn bought manufacturing rights from Colin

Chapman, and by developing ever more powerful versions for more than 30 years, turned Caterham into one of the world's most prolific and affordable sports-racing cars. Widely recognized as the standard work on the history of Caterham and its cars from the original Lotus Seven of 1957 and its Caterham derivative of 1973 to the latest Cosworth-powered Caterham CSR of 2005. This edition is updated with 64 pages of additional material. 2nd ed.

Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with

important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.
