The Mie Theory Wolfram Hergert 2012-06-30 This book presents in a concise way the Mie theory and its current applications. It begins with an overview of current theories, computational methods, experimental techniques, and applications of optics of small particles. There is also some biographic information on Gustav Mie, who published his famous paper on the colour of Gold colloids in 1908. The Mie solution for the light scattering of small spherical particles set the basis for more advanced scattering theories and today there are many methods to calculate light scattering and absorption for practically any shape and composition of particles. The optics of small particles is of interest in industrial, atmospheric, astronomic and other research. The book covers the latest developments in divers fields in scattering theory such as

plasmon resonance, multiple scattering and optical force.

Sailing Through Troubled Waters Mitri Raheb 2013-05 It was in 1988 that Mitri Raheb was ordained Pastor in the Evangelical Lutheran Church of Jordan and the Holy Land and was installed as Pastor of the Evangelical Lutheran Christmas Church in Bethlehem after finishing his seminary studies and doctorate in Germany in Church History. Besides being a Pastor, Mitri Raheb continued to be involved in the theological discussion and research both at home as well as in regional and international settings. The selected articles were given by Rev. Raheb at several occasions. The first article on Christianity and Religious plurality was given at Fuller Seminary in 2003 during the author sabbatical as Mission Partner in Residence with the PCUSA. The second and third articles on the political and ecclesiastical context in the Arab Peninsula during the 6-7th centuries were part of a Post doctoral research that the author did during his stay at Harford Seminary in Connecticut. The article on the History of the Evangelical Lutheran Church in Jordan and the Holy Land is a summary of the author's doctoral dissertation at Marburg University and of his German book "Das reformatorische Erbe unter den palaestinensern" published by Guetrslöh in 1990. The article on the Situation of the Palestinian Christian community in the Holy Land was given as lecture to several church delegation interested in the situation of the Christians of the Holy land, while the article on the Arab Spring was given at a regional conference in Lebanon. The last chapter of the book is different in nature since it is actually a short lecture given at a hearing at the Danish Parliament, Christiansburg, in Copenhagen on May 21st 2012. Diyar publisher is happy to publish these mostly unpublished articles of Rev. Dr. Mitri Raheb to coincide with his silver ordination in May

2013.

Fundamentals of Organometallic Catalysis Dirk Steinborn 2012 Catalysis, the basic principle for overcoming the kinetic inhibition of chemical reactions, is fundamental in chemistry. In particular, organometallic catalysis plays an overwhelming role in both research and industry. It opens the way to entirely novel synthetic methods and finds widespread applications ranging from mass-production of everyday polymers to stereocontrolled synthesis of bioactive chemicals used as pharmaceuticals and agrochemicals. The targeted development of improved and novel catalysts demands understanding of the relationships between their structures and catalytic properties. Accordingly, this textbook offers the reader a fundamental understanding of the course of organometallic-catalyzed reactions, starting at the molecular level. The initial chapters explain the principles of catalysis and the elementary steps in organometallic catalysis. The book then explores important organometallic-catalyzed reactions, with a focus on mechanism. Current developments are emphasized throughout. Asymmetric synthesis is covered in depth. Finally, the book examines the catalytic behavior of particular metalloenzymes. A look at nitrogen fixation offers a comparative examination of the three major areas of catalysis -

homogeneous, heterogeneous, and enzymatic. In addition to problems, the textbook offers solutions, making the book an invaluable learning tool. It is a must-have for advanced students in chemistry and biochemistry, as well as for inorganic and organic chemists, for those working with organometallics, and for those specializing in catalysis.

Mental Health Stigma in the Military Joie D. Acosta 2014 Despite the efforts of both the U.S. Department of Defense and the Veterans Health Administration to enhance mental health services, many service members are not regularly seeking needed care when they have mental health problems. Without

appropriate treatment, these mental health problems can have wide-ranging and negative impacts on the quality of life and the social, emotional, and cognitive functioning of affected service members. The services have been actively engaged in developing policies, programs, and campaigns designed to reduce stigma and increase service members' help-seeking behavior. However, there has been no comprehensive assessment of these efforts' effectiveness and the extent to which they align with service members' needs or evidence-based practices. The goal of this research was to assess DoD's approach to stigma reduction, how well it is working and how it might be improved. To address these questions, RAND researchers used five complementary methods: (1) literature review, (2) a microsimulation modeling of costs, (3) interviews with program staff, (4) prospective policy analysis, and (5) an expert panel. The priorities outlined in this report identify ways in which program and policy development and research and evaluation can improve understanding of how best to efficiently and effectively provide needed treatment to service members with mental illness.

The Taxation of Permanent Establishments Sven Hentschel 2021-06-26 This book provides a comprehensive analysis of the rules governing the taxation of permanent establishments as implemented in the OECD Model Tax Convention and German national tax law. Deviations between the OECD approach and the German approach are identified and modifications to the rules as a result of the Base Erosion and Profit Shifting (BEPS) project are examined. Moreover, challenges imposed to the PE concept as a result of the digitalisation of the economy are identified and discussed. Against this background, the Pillar One Blueprint proposing a long-term solution to overcome the tax challenges arising from the digitalisation of the economy is presented and assessed against widely accepted overarching principles of tax policy.

Pay for Performance in Health Care Jerry Cromwell 2011-02-28 This book provides a balanced assessment of pay for performance (P4P), addressing both its promise and its shortcomings. P4P programs have become widespread in health care in just the past decade and have generated a great deal of enthusiasm in health policy circles and among legislators, despite limited evidence of their effectiveness. On a positive note, this movement has developed and tested many new types of health care payment systems and has stimulated much new thinking about how to improve quality of care and reduce the costs of health care. The current interest in P4P echoes earlier enthusiasms in health policy—such as those for capitation and managed care in the 1990s—that failed to live up to their early promise. The fate of P4P is not yet certain, but we can learn a number of lessons from experiences with P4P to date, and ways to improve the designs of P4P programs are becoming apparent. We anticipate that a “second generation” of P4P programs can now be developed that can have greater impact and be better integrated with other interventions to improve the quality of care and reduce costs.
