Allied Participation in Vietnam Lt. Stanley Larsen 2015-10-02 More than forty nations provided assistance to the Republic of Vietnam in its struggle against North Vietnam. This aid ranged from economic and technical assistance to educational and humanitarian contributions. Hundreds of Free World civilians worked in Vietnam as doctors, teachers, and technical specialists. Eight nations also provided military assistance. The flags of these Free World countries-the United States, the Republic of Korea, Thailand, Australia, New Zealand, the Philippines, the Republic of China, and Spain-flew alongside the colors of the Republic of Vietnam at the headquarters of the Free World Military Assistance Forces in Saigon. The military contributions of these nations included combat troops, army medical teams, and individual political warfare advisers. The degree of assistance and co-operation among the concerned Free World nations resulted from years of work and involvement. While many nations expressed sympathy for the plight of South Vietnam, aid did not always come easily, quickly, or to the extent desired. Many nations, beset by their own internal economic and political problems, could do little to help; others did nothing. The story of the efforts of the contributing nations and the efforts to enlist their aid is the subject of this monograph.

Commander's Legal Handbook Judge Advocate General's Legal Center and School (United States. Army) 2012-06-15 This Handbook is designed to assist Army Commanders in taking proper immediate action when faced with a variety of legal issues that might arise during your command. The purpose of your actions should be to preserve the legal situation until you can consult with your servicing Judge Advocate. However, like most aspects of your command responsibilities, you can fail if you just wait for things to come to you. You need to be proactive in preventing problems before they occur. In the legal arena, this

means establishing and enforcing high standards, ensuring your Soldiers are fully aware of those standards and properly trained to comply with them. You must also properly train your Soldiers on all Army policies and higher level command standards so that they also understand and comply with them. Soldiers must also be well-versed in the Army Values and be able to apply those values to real- world situations, which will usually keep them well within legal bounds. The Structuring of Organizations Henry Mintzberg 1979 How do organizations structure themselves? A synthesis of the empirical literature in the field, supported by numerous examples and illustrations, provides images that produce a theory. The author introduces five basic configurations of structure - the simple structure, the machine bureaucracy, the professional bureaucracy, the divisionalized form, and the adhocracy. This book reveals that structure seems to be at the root of many questions about organizations and why they function as they do.

Reserve Component Personnel Issues Lawrence Kapp 2011-04 The term  $\zeta$ Reserve Component $\zeta$  is used to refer collectively to the seven individual reserve components of the armed forces: the Army Nat. Guard (NG), the Army Reserve, the Navy Reserve, the Marine Corps Reserve, the Air NG, the Air Force Reserve, and the Coast Guard Reserve. These reserve components  $\zeta$ provide trained units and qualified persons available for active duty in the armed forces. $\zeta$  Since 1990, reservists have been involuntarily activated six times, incl. two large-scale mobilizations for the Persian Gulf War and in the aftermath of 9/11. This increasing use of the reserves has led to interest in funding, equipment, and personnel policy. This report provides an overview of key reserve component personnel issues. Reserve Component General and Flag Officers Lisa M. Harrington 2016-02-29 Increased use of the reserve component has renewed interest in the question of the appropriate number of reserve component general and flag officers. RAND researchers conducted a review of requirements for reserve component general and flag officers.

Review of the U.S. Army Corps of Engineers Restructured Upper Mississippi River-Illinois Waterway Feasibility Study National Research Council 2005-01-22 For the past few years, the Corps has been working on what is known as the Restructured Upper Mississippi River-Illinois Waterway Feasibility Study, the heart of which is a multibillion-dollar proposal to double the length of up to a

dozen locks on the river. The Research Council first reviewed the feasibility study in 2001 during controversies over the accuracy of models being used by the Corps to justify lock expansion based on increased demand for barge transportation. More than 100 million tons of cargo--half of it grain destined for international markets, the other half goods such as construction materials, coal, and chemicals--are shipped along the navigation system each year. The locks, which along with dams allow barges to traverse uneven river depths, were originally designed for "tows" of barges up to 600 feet long, but the length of a typical tow has increased, forcing the Corps to look for ways to relieve congestion. The book finds the U.S. Army Corps of Engineers has made good progress in broadening its proposed plan for navigation improvements on the Upper Mississippi River-Illinois Waterway system to give greater consideration to ecological restoration. However, the plan still does not provide sufficient economic justification for expanding locks on the rivers because of flaws in the models the Corps used to predict demand for barge transportation. Little attention is paid to inexpensive, nonstructural navigation improvements that could help better manage existing levels of barge traffic. The revised plan has been usefully expanded to include many creative and potentially useful ecosystem restoration measures. These measures, however, should be more firmly grounded in river science principles and more broadly consider ways the river's ecology might affect or be affected by navigation, recreation and other uses.

Hazing in the U.S. Armed Forces Kirsten M. Keller 2015-08-12 This report documents research focused on helping the Department of Defense build a more-systematic approach to hazing prevention and response. The report documents theory and research on the root causes of hazing and findings and recommendations regarding how best to define hazing, practices to prevent and respond to incidents of hazing, and how the armed forces can improve the tracking of hazing incidents.

Army Food Program Department of the Army 2012-07-24 This regulation encompasses garrison, field, and subsistence supply operations. Specifically, this regulation comprises Army Staff and major Army command responsibilities and includes responsibilities for the Installation Management Command and subordinate regions. It also establishes policy for the adoption of an à la carte dining facility and for watercraft to provide subsistence when underway or in dock. Additionally, the regulation identifies DOD 7000.14-R as the source of meal rates for reimbursement purposes; delegates the approval authority for catered meals and host nation meals from Headquarters, Department of the Army to the Army commands; and authorizes the use of the Government purchase card for subsistence purchases when in the best interest of the Government. This regulation allows prime vendors as the source of garrison supply and pricing and provides garrison menu standards in accordance with

The Surgeon General's nutrition standards for feeding military personnel. Also, included is guidance for the implementation of the U.S. Department of Agriculture Food Recovery Program.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Cassino to the Alps Ernest Fisher, Jr. 2015-07-16 (Includes maps) From September 1943, when Allied troops came ashore near Salerno, until German surrender in May 1945, 312,000 Allied soldiers were killed, wounded, or missing in Italy. Was a campaign that from the first faced the bleak prospect of coming to a dead end against the forbidding escarpment of the Alps worth that cost? Was the objective of tying down German troops to avoid their commitment in northwestern Europe all that the campaign might have accomplished? The answers to those questions have long been sought but, as is the nature of history, must forever remain conjecture. What is established bet, as this volume makes clear, is the tenacity and intrepidity displayed by American and Allied soldiers in the face of a determined and resourceful enemy, harsh weather, sharply convoluted terrain, limited numbers, and indefinite goals in what many of them must have looked upon as a backwater of the war. This volume relates the story of the last year of their struggle. Three volumes previously published tell of the campaign in northwest Africa, the conquest of Sicily and covert politico-military negotiations leading to surrender of the Italian armed forces, and the campaign from the Allied landings on the mainland through the bitter disappointment of the amphibious assault at Anzio. This volume is thus the capstone of a four-volume series dealing with American military operations in the western Mediterranean.
