Evil by Design Chris Nodder 2013-06-05 How to make customers feel good about doing what you want Learn how companies make us feel good about doing what theywant. Approaching persuasive design from the dark side, this

book melds psychology, marketing, and design concepts to show why we're susceptible to certain persuasive techniques. Packed with examples from every nook and cranny of the web, it provides easily digestible and applicable patterns for putting these design techniques to work. Organized by the seven deadly sins, it includes: Pride — use social proof to position your product in line with your visitors' values Sloth — build a path of least resistance that leads users where you want them to go Gluttony — escalate customers' commitment and use loss aversion to keep them there Anger — understand the power of metaphysical arguments and anonymity Envy — create a culture of status around your product and feed aspirational desires Lust — turn desire into commitment by using emotion to defeat rational behavior Greed — keep customers engaged by reinforcing the behaviors you desire Now you too can leverage human fallibility to create powerful persuasive interfaces that people will love to use — but will you use your new knowledge for good or evil? Advances in Dryland Farming in the Inland Pacific Northwest Georgine Yorgey 2017-06-15 The Pacific Northwest is an important wheat production region. In 2015, the National Agricultural Statistics Service indicated that Washington, Idaho, and Oregon harvested more than 240 million bushels of wheat, worth an estimated \$1.3 billion. The major areas of production in the inland Pacific Northwest include three major land resource areas with distinctive geologic features and soils as defined by the US Department of Agriculture: the Columbia Basin, the Columbia Plateau, and the Palouse and Nez Perce Prairies, all of which are within the Northwestern Wheat and Range Region. It also includes a small portion of dryland cropping in the North Rocky Mountains major land resource area, adjacent to the eastern edge of the Palouse and Nez Perce Prairies. In the dryland areas, which are the focus of this book, wheat is grown in rotation with crop fallow and much smaller acreages of other small grains, legumes, and alternative crops. In light of ongoing and new challenges being faced by farmers in the region it is an opportune time to synthesize research-based advances in knowledge to support farmer decision-making and improve the long-term productive capacity of farmland in the region. This book should be viewed as a resource that launches further inquiry rather than an end point.

The Economics and Politics of Oil in the Caspian Basin Boris Najman 2007-09-12 The Caspian Basin region has boomed since the late 1990s due to new oil discoveries, new pipelines that have diversified countries' transport options and world oil prices that have risen from below \$10 in 1998 to \$70 in 2006. This book analyzes the experience of the Caspian countries during the oil boom. It is founded on empirical studies, using either macroeconomic tools or an analysis of public budgets, or microeconomic analysis of household survey data or fieldwork in oil-producing regions. Moving from aggregated to disaggregated analysis and, in-keeping with its emphasis on rigorous empirical analysis to the greatest extent possible, several chapters are written by specialists on the Caspian region. Whilst there is an emphasis on the economic consequences of the oil boom, the interdisciplinary aspects of the phenomenon are also recognized. Overall, the analysis is firmly rooted in the region, yet the empirical studies also provide a basis for drawing broader lessons about the effects of an oil boom.

The Sailing Mind Roberto Casati 2022-06-01 This book scrutinizes the practice of sailing and its relation to philosophy of mind. Sailing brings about a peculiar human-artifact interaction which can lead to unexplored research paths. The idea behind this collection is that this interaction is better scrutinized by sailor scientists/philosophers to open up new possible pathways in research. Fascinating theoretical breakthroughs have been provided by observing sailing practices with the most well-known being Hutchins' introduction in cognitive science of the concept of "distributed cognition." However, in times past, sailing has both fueled philosophical metaphors, from Theseus' ship to Plato's image of the intellect as the boatperson of the soul, and inspired philosophers' views (as happened to Herder during a stormy sea trip). The ecology of sailing is highly constrained: sailboats move at the surface between a compressible fluid and an incompressible fluid. Wind originates in certain specific circumstances. Only certain sequences of actions are possible to take advantage of this ecology. The ontology of sailing is both of the boat and of the ocean/wind system. It highlights the fact that sailboats have been for centuries arguably the most complex technological artifacts in each culture that developed them, precisely because the environment they are engaging is so peculiar and demanding - almost the precise dual of Sapiens' adaptive environment. This volume will appeal to philosophers of mind, cognitive psychologists, and marine professionals.

Mastering the Core Teachings of the Buddha Daniel Ingram 2020-01-20 The very idea that the teachings can be mastered will arouse controversy within Buddhist circles. Even so, Ingram insists that enlightenment is an attainable goal, once our fanciful notions of it are stripped away, and we have learned to use meditation as a method for examining reality rather than an opportunity to wallow in self-absorbed mind-noise. Ingram sets out concisely the difference between concentration-based and insight (vipassana) meditation; he provides example practices; and most importantly he presents detailed maps of the states of mind we are likely to encounter, and the stages we must negotiate as we move through clearly-defined cycles of insight. Its easy to feel overawed, at first, by Ingram's assurance and ease in the higher levels of consciousness, but consistently he writes as a down-to-earth and compassionate guide, and to the practitioner willing to commit themselves this is a glittering gift of a book. In this new edition of the bestselling book, the author rearranges, revises and expands upon the original material, as well as adding new sections that bring further clarity to his ideas.

Lead from the Outside Stacey Abrams 2018-04-24 Lead from the Outside is a necessary guide to harnessing the strengths of being an outsider by Stacey Abrams, one of the most prominent black female politicians in the U.S. Leadership is hard. Convincing others—and often yourself—that you possess the answers and are capable of world-affecting change requires confidence, insight, and sheer bravado. Stacey Abrams's Lead from the Outside is the handbook for outsiders, written with the awareness of the experiences and challenges that hinder anyone who exists beyond the structure of traditional white male power—women, people of color, members of the LGBTQ community, and millennials ready to make a difference. In Lead from the Outside, Stacey Abrams argues that knowing your own passion is the key to success, regardless of the scale or target. From launching a company, to starting a day care center for homeless teen moms, to running a successful political campaign, finding what you

want to fight for is as critical as knowing how to turn thought into action. Stacey uses her experience and hard-won insights to break down how ambition, fear, money, and failure function in leadership, while offering personal stories that illuminate practical strategies. Stacey includes exercises to help you hone your skills and realize your aspirations. She discusses candidly what she has learned over the course of her impressive career: that differences in race, gender, and class are surmountable. With direction and dedication, being in the minority actually provides unique and vital strength, which we can employ to rise to the top and make real change.
