Global Business Today Charles W. L. Hill 2005-01 Charles Hill's Global Business

Today, 4e (GBT) has become an established text in the International Business market for its excellent but concise coverage of the key global issues including the cultural context for global business, cross-border trade and investment, the global monetary system and competition in the global environment. GBT's concise chapters give a general introduction to international business - emphasizing the environmental factors, with less coverage of operations. Charles Hill is renowned for his attention to research trends and that is evident in Global Business Today, 4e through a variety of real world examples and cases from small, medium, and large companies throughout the world

Permanent Establishment Arvid Aage Skaar 2020-06-19 A new edition of the preeminent work on the permanent establishment (PE) is a major event in tax law scholarship. Taking into account changes in judicial and administrative practice as well as the Organisation for Economic Co-operation and Development's (OECD's) and the United Nation's (UN's) work in the three decades since the first edition, the present study brings the analysis up to date with the current internationally accepted interpretation of PE. The analysis is based on more than 720 cases from more than 20 countries, in addition to the OECD and UN model treaties and more than 630 books, articles, and official documents. The increased significance of the digital economy has rendered the traditional concept of PE inadequate for the allocation of taxing jurisdiction over the modern, mobile or digital international business. The author's in-depth analysis

explains the legal elements of the PE principle with attention to their continuing benefit and their shortcomings: criteria defining a PE- place of business, location, right of use, duration, business connection, business activity, ordinary course of business; evidence of a right of use to a place of business; business activities included in the PE concept of the tax treaties; identification of projects offshore and onshore; UN model treaty deviations from the OECD agency clause; distinction between jurisdictions with significant natural resources and countries possessing the capital, technology and know-how necessary to explore and exploit these resources; and how policies in each country may erode the PE concept. The book provides many synopses of court decisions and administrative rulings upon which the analysis is based. In addition to cases previously published in law reports and other publications, a number of unpublished decisions are included. A key word index makes it easy to find what is needed in any particular matter. The PE principle, in one version or another, is used in several thousand tax treaties in force today. This updated comprehensive study reveals the obligations imposed through the use of PE in tax treaties and will continue to be of immeasurable value to tax practitioners and scholars worldwide. In addition, the discussion of whether the notion of PE is an appropriate criterion for taxing jurisdiction in international fiscal law today provides authoritative and insightful food for thought.
