Voice and Agency Jeni Klugman 2014-09-29 Despite recent advances in important aspects of the lives of girls and women, pervasive challenges remain. These challenges reflect widespread deprivations and constraints and include epidemic levels of gender-based violence and discriminatory laws and norms that prevent women from owning property, being educated, and making meaningful decisions about their own lives--such as whether and when to marry or have children. These often violate their most basic rights and are magnified and multiplied by poverty and lack of education. This groundbreaking book distills vast data and hundreds of studies to shed new light on deprivations and constraints facing the voice and agency of women and girls worldwide, and on the associated costs for individuals, families, communities, and global development. The volume presents major new findings about the patterns of constraints and overlapping deprivations and focuses on several areas key to women's empowerment: freedom from violence, sexual and reproductive health and rights, ownership of land and housing, and voice and collective action. It highlights promising reforms and interventions from around the world and lays out an urgent agenda for governments, civil society, development agencies, and other stakeholders, including a call for greater investment in data and knowledge to benchmark progress.

A Saurashtra-English Dictionary Norihiko U?ida 1990 The language is spoken by Saurashtrians, who mostly live in Tamil Nadu and belong to a cast of weavers. According to their oral tradition, they stem from Saurashtra and left their home when it was conquered by Muslims. They immigrated into Tamil Nadu by way of Maharashtra and Andhraradesh. The Saurashtra language is one of Indo-Aryan languages as Hindi, Gujarati, etc., are. However, as the Saurashtrians live in the Dravidian linguistic area, their language has become almost Dravidian in grammatical structure though its basic vocabulary is still Indo-Aryan. The language has many loanwords from Marathi, Telugu and Tamil, which supports the evidence of their oral tradition. This dictionary, the first modern lexicography of the Saurashtra language, contains a short grammar and a vocabulary of the Bangalore dialect of the same language.

Election Law Landmark Publications 2020-11-05 THIS CASEBOOK contains a selection of U. S. Court of Appeals decisions that analyze and discuss issues surrounding election law. Volume 2 of the casebook covers the Sixth through the Eleventh Circuit Court of Appeals. * * * [W]hen a "plaintiff alleges that a state has burdened voting rights through the disparate treatment of voters," [] precedent requires us to apply the Anderson-Burdick framework. Obama for Am. v. Husted, 697 F.3d 423, 429 (6th Cir. 2012). Under Anderson-Burdick, we first look to the burden the State's regulation imposes on the right to vote. Burdick, 504 U.S. at 434, 112 S.Ct. 2059; Obama for Am., 697 F.3d at 428. When States impose "reasonable nondiscriminatory restrictions" on the right to vote, courts apply rational basis review and "the State's important regulatory interests are generally sufficient to justify" the restrictions." Burdick, 504 U.S. at 434, 112 S.Ct. 2059 (quoting Anderson v. Celebrezze, 460 U.S. 780, 788, 103 S.Ct. 1564, 75 L.Ed.2d 547 (1983)); see Obama for Am., 697 F.3d at 429. But when States impose severe restrictions on the right to vote, such as poll taxes or limiting access to the ballot, strict scrutiny applies. Burdick, 504 U.S. at 434, 112 S.Ct. 2059 (citing Norman v. Reed, 502 U.S. 279, 289, 112 S.Ct. 698, 116 L.Ed.2d 711 (1992)); Obama for Am., 697 F.3d at 429. It is when cases fall between these two extremes that the Anderson-Burdick framework departs from the traditional tiers of scrutiny and creates its own test. For these intermediate cases, where the burden on the right to vote is moderate, we must weigh that burden against "the precise interests put forward by the State as justifications for the burden imposed by its rule," taking into consideration "the extent to which those interests make it necessary to burden the plaintiff's rights." Burdick, 504 U.S. at 434, 112 S.Ct. 2059 (quoting Anderson, 460 U.S. at 789, 103 S.Ct. 1564). Only where the State's interests outweigh the burden on the plaintiff's right to vote do voting restrictions not offend the Equal Protection Clause. Obama for Am., 697 F.3d at 433. While this standard is flexible, we must ultimately "make the 'hard judgment' that our adversary system demands." Crawford, 553 U.S. at 190, 128 S.Ct. 1610 (Stevens, J., announcing the judgment of the Court). Mays v. LaRose, 951 F. 3d 775 (6th Cir. 2020)

The fox decides to make fun of a stork by treating it to a plate of soup. The stork is unable to drink the soup and leaves the fox's house hungry. The stork decides to teach the fox a lesson. The next day when the fox goes to the stork's house for dinner, the stork treats the fox to a tall jar of soup. The fox goes home hungry and realises its mistake.

Preventing Suicide Who 2015-01-31 "Suicides are preventable. Even so, every 40 seconds a person dies by suicide somewhere in the world and many more attempt suicide. Suicides occur in all regions of the world and throughout the lifespan. Notably, among young people 15-29 years of age, suicide is the second leading cause of death globally. Suicide impacts on the most vulnerable of the world's populations and is highly prevalent in already marginalized and discriminated groups of society. It is not just a serious public health problem in developed countries; in fact, most suicides occur in low- and middle-income countries where resources and services, if they do exist, are often scarce and limited for early identification, treatment and support of people in need. These striking facts and the lack of implemented timely interventions make suicide a global public health problem that needs to be tackled imperatively. This report is the first WHO publication of its kind and brings together what is known in a convenient form so that immediate actions can be taken. The report aims to increase the awareness of the public health significance of suicide and suicide attempts and to make suicide prevention a higher priority on the global public health agenda. It aims to encourage and support countries to develop or strengthen comprehensive suicide prevention strategies in a multisectoral public health approach. For a national suicide prevention strategy, it is essential that governments assume their role of leadership, as they can bring together a multitude of stakeholders who may not otherwise collaborate. Governments are also in a unique position to develop and strengthen surveillance and to provide and disseminate data that are necessary to inform action. This report proposes practical guidance on strategic actions that governments can take on the basis of their resources and existing suicide prevention activities. In particular, there are evidence-based and low-cost interventions that are effective, even in resource-poor settings. This publication would not have been possible without the significant contributions of experts and partners from all over the world. We would like to thank them for their important work and support. The report is intended to be a resource that will allow policy-makers and other stakeholders to make suicide prevention an imperative. Only then can countries develop a timely and effective national response and, thus, lift the burden of suffering caused by suicide and suicide attempts from individuals, families, communities and society as a whole."--Preface, page 03.

Translating India Rita Kothari 2003 The cultural universe of urban, English-speaking middle class in India shows signs of growing inclusiveness as far as English is concerned. This phenomenon manifests itself in increasing forms of bilingualism (combination of English and one Indian language) in everyday forms of speech - advertisement jingles, bilingual movies, signboards, and of course conversations. It is also evident in the startling prominence of Indian Writing in English and somewhat less visibly, but steadily rising, activity of English translation from Indian languages. Since the eighties this has led to a frenetic activity around English translation in India's academic and literary circles. Kothari makes this very current phenomenon her chief concern in Translating India. The study covers aspects such as the production, reception and marketability of English translation. Through an unusually multi-disciplinary approach, this study situates English translation in India amidst local and global debates on translation, representation and authenticity. The case of Gujarati - a case study of a relatively marginalized language - is a unique addition that demonstrates the micro-issues involved in translation and the politics of language. Rita Kothari teaches English at St. Xavier's College, Ahmedabad (Gujarat), where she runs a translation research centre on behalf of Katha. She has published widely on literary sociology, postcolonialism and translation issues. Kothari is one of the leading translators from Gujarat. Her first book (a collaboration with Suguna Ramanathan) was on English translation of Gujarati poetry (Modern Gujarati Poetry: A Selection, Sahitya Akademi, New Delhi, 1998). Her English translation of the path-breaking Gujarati Dalit novel Angaliyat is in press (The Stepchild, Oxford University Press). She is currently working on an English translation of Gujarati short stories by women of Gujarat, a study of the nineteenth-century narratives of Gujarat, and is also engaged in a project on the Sindhi identity in India.

Living Zoroastrianism Philip G. Kreyenbroek 2001 This text describes the realities of modern Parsi religion through 30 interviews in which urban Parsis belonging to different social milieus and religious schools of thought discuss various aspects of their religious lives. Zoroastrianism, the faith founded by the Iranian prophet Zarathustra, originated around 1000BCE and is widely regarded as the world's first revealed religion. Although the number of its followers declined dramatically in the centuries after the 7th century Islamic conquest of Iran, Zoroastrians survive in Iran to the present day. The other major Zoroastrian community are the Parsis of India, descendants of Zoroastrians who fled Muslim dominion.

Zero to One Peter Thiel 2014-09-16 #1 NEW YORK TIMES BESTSELLER • "This book delivers completely new and refreshing ideas on how to create value in the world."—Mark Zuckerberg, CEO of Meta "Peter Thiel has built multiple breakthrough companies, and Zero to One shows how."—Elon Musk, CEO of SpaceX and Tesla The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create. In Zero to One, legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things. Thiel begins with the contrarian premise that we live in an age of technological stagnation, even if we're too distracted by shiny mobile devices to notice. Information technology has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won't make a search engine. Tomorrow's champions will not win by competing ruthlessly in today's marketplace. They will escape competition altogether, because their businesses will be unique. Zero to One presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to

find value in unexpected places.

Broken Ballots Douglas Jones 2012 For many of us, the presidential election of 2000 was a wake-up call. The controversy following the vote count led to demands for election reform. But the new voting systems that were subsequently introduced to the market have serious security flaws, and many are confusing and difficult to use. Moreover, legislation has not kept up with the constantly evolving voting technology, leaving little to no legal recourse when votes are improperly counted. How did we come to acquire the complex technology we now depend on to count votes? Douglas Jones and Barbara Simons probe this question, along with public policy and regulatory issues raised by our voting technologies. *Broken Ballots* is a thorough and incisive analysis of the current voting climate that approaches American elections from technological, legal, and historical perspectives. The authors examine the ways in which Americans vote today, gauging how inaccurate, unreliable, and insecure our voting systems are. An important book for election administrators, political scientists, and students of government and technology policy, *Broken Ballots* is also a vital tool for any voting American.

An Introduction to Language and Linguistics Ralph Fasold 2006-03-06 This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

Indians in America Pravin N. Sheth 2001 "Indians in America have emerged as one of the most dynamic immigrant communities in the American mosaic. This book narrates their diasporic saga covering pre-1950 stream, and two waves (post-1965, and 1980), and profiles the three generations. It examines empirically the gaps in the perceptions and priorities of the first-generation parents, their second-generation children, and the elderly. It also probes the complex relationship pattern of the emerging new Indian woman in the family as well as the latent phenomenon of domestic violence. The first of its kind presenting a comprehensive account of the Indian diaspora in America, this book will prove to be of great value to the Indian-American community, and to the students of diaspora with a focus on this community. So also, those interested in studying the issues of identity and cultural assimilation, immigration history, and multiculturalism will find it immensely useful."

The Zoroastrian Diaspora John R. Hinnells 2005-04-28 What is the distinctive Zoroastrian experience, and what is the common diasporic experience? The Zoroastrian Diaspora is the outcome of twenty years of research and of archival and fieldwork in eleven countries, involving approximately 250,000 miles of travel. It has also involved a survey questionnaire in eight countries, yielding over 1,840 responses. This is the first book to attempt a global comparison of Diaspora groups in six continents. Little has been written about Zoroastrian communities as far apart as China, East Africa, Europe, America, and Australia or on Parsis in Mumbai post-Independence. Each chapter is based on unused original sources ranging from nineteenth century archives to contemporary newsletters. The book also includes studies of Zoroastrians on the Internet, audio-visual resources, and the modern development of Parsinovels in English. As well as studying the Zoroastrians for their own inherent importance, this book contextualizes the Zoroastrian migrations within contemporary debates on Diaspora studies. John R. Hinnells examines what it is like to be a religious Asian in Los Angeles or London, Sydney or Hong Kong. Moreover, he explores not only how experience differs from one country to another, but also the differences between cities in the same country, for example, Chicago and Houston. The survey data is used firstly to consider the distinguishing demographic features of the Zoroastrian communities in various countries; and secondly to analyse different patterns of assimilation between different groups: men and women and according to the level and type of education. Comparisons are also drawn between people from rural and urban backgrounds; and between generations in religious beliefs and practices, including the preservation of secular culture.

Luxury for Export Pedro de Moura Carvalho 2008 Soon after the Portuguese opened the first direct sea route from Europe to Asia, they established trading centers in India and Sri Lanka. By the early 1500s, the courts and the cities of Europe had become avid consumers of luxury goods imported from South Asia. This book shows how the trade in exotica spurred the development of an extraordinary hybrid art, at once Indian and Portuguese. Many of the featured objects have never before been properly identified or presented to the public. AUTHOR: Pedro Moura Carvalho is Aga Khan Fellow at Harvard University. 57 illustrations

Econometric Analysis of Cross Section and Panel Data, second edition Jeffrey M. Wooldridge 2010-10-01 The second edition of a comprehensive state-of-the-art graduate level text on microeconomic methods, substantially revised and updated. The second edition of this acclaimed graduate text provides a unified treatment of two methods used in contemporary econometric research, cross section and data panel methods. By focusing on assumptions that can be given behavioral content, the book maintains an appropriate level of rigor while emphasizing intuitive thinking. The analysis covers both linear and nonlinear models, including models with dynamics and/or individual heterogeneity. In addition to general estimation frameworks (particular methods of moments and maximum likelihood), specific linear and nonlinear methods are covered in detail, including probit and logit models and their multivariate, Tobit models, models for count data, censored and missing data schemes, causal (or treatment) effects, and duration analysis. *Econometric Analysis of Cross Section and Panel Data* was the first graduate econometrics text to focus on microeconomic data structures, allowing assumptions to be separated into population and sampling assumptions. This second edition has been substantially updated and revised. Improvements include a broader class of models for missing data problems; more detailed treatment of cluster problems, an important topic for empirical researchers; expanded discussion of "generalized instrumental variables" (GIV) estimation; new coverage (based on the author's own recent research) of inverse probability weighting; a more complete framework for estimating treatment effects with panel data, and a firmly established link between econometric approaches to nonlinear panel data and the "generalized estimating equation" literature popular in statistics and other fields. New attention is given to explaining when particular econometric methods can be applied; the goal is not only to tell readers what does work, but why certain "obvious" procedures do not. The numerous included exercises, both theoretical and computer-based, allow the reader to extend methods covered in the text and discover new insights.

Election Law Landmark Publications 2021-09-22 THIS CASEBOOK contains a selection of U. S. Court of Appeals decisions that analyze and discuss issues stemming from election law. Volume 1 of the casebook covers the District of Columbia Circuit and the First through the Fifth Circuit Court of Appeals. Any restrictions on access to the ballot necessarily "implicate substantial voting, associational[,] and expressive rights protected by the First and Fourteenth Amendments." *McLaughlin v. N.C. Bd. of Elections*, 65 F.3d 1215, 1221 (4th Cir. 1995). However, states have the power to regulate the time, place, and manner of their own elections, see U.S. Const. art. 1, § 4, cl. 1, to ensure that "some sort of order, rather than chaos, ... accompan[ies] the democratic processes," *Burdick*, 504 U.S. at 433, 112 S.Ct. 2059 (quoting *Storer v. Brown*, 415 U.S. 724, 730, 94 S.Ct. 1274, 39 L.Ed.2d 714 (1974)). Accordingly, in evaluating a challenge to a ballot-access law, courts must weigh the character and magnitude of the asserted injury to the rights protected by the First and Fourteenth Amendments that the plaintiff seeks to vindicate against the precise interests put forward by the State as justifications for the burden imposed by its rule, taking into consideration the extent to which those interests make it necessary to burden the plaintiff's rights. *Id.* at 434, 112 S.Ct. 2059 (citation omitted). When election laws "impose a severe burden on ballot access," those laws "are subject to strict scrutiny," and will be upheld only if the laws are "narrowly drawn" to support a compelling state interest. *Pisano v. Strach*, 743 F.3d 927, 933 (4th Cir. 2014)

(citation omitted). Election laws that impose only a "modest" burden will be upheld if the state can "articulate" its "important regulatory interests." *Libertarian Party of Va. v. Alcorn*, 826 F.3d 708, 716, 719 (4th Cir. 2016) (citations omitted). A "state's important regulatory interests are generally sufficient to justify reasonable, nondiscriminatory restrictions." *Anderson v. Celebrezze*, 460 U.S. 780, 788, 103 S.Ct. 1564, 75 L.Ed.2d 547 (1983). *Buscemi v. Bell*, 964 F. 3d 252 (4th Cir. 2020)

Asian Patients in Hospital and at Home Alix Henley 1979 Hospital and community health services in nearly every large town in Britain are now caring for Asian patients from India, Pakistan, Bangladesh and East Africa. At an individual level many health workers find it difficult to understand and to cater for the particular needs and expectations of their Asian patients. This is frequently because they have no reliable information to work from and so cannot know what their patients need. In addition, because they are working across barriers of culture and language they may themselves find their work more difficult and less satisfying. They may be working under increased pressure. This book aims to fill some of the information gaps. Asian families at home, in Britain. Religion, sickness and health. Home visits. Mothers and babies. Names. Personal hygiene. Clothes, jewellery and makeup. Food. The language barrier. Asian language. Interpreters.
