How People Learn II National Academies of Sciences, Engineering, and Medicine 2018-10-27 There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, How People Learn: Brain, Mind, Experience, and School: Expanded Edition was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. How People Learn II: Learners, Contexts, and Cultures provides a much-needed update incorporating insights gained from this research over the past

decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

Educating Learners with Down Syndrome Rhonda Faragher 2013-10-23 For individuals with Down syndrome, the extent of the effect of intellectual disability depends largely on the degree of provision of appropriate support and intervention. In *Educating Learners with Down Syndrome*, editors Rhonda Faragher and Barbara Clarke have brought together a number of expert contributors, whose chapters review recent findings in the field of DS education, highlight promising practices, and identify areas for future research. While the emphasis is primarily on the school years, links to early intervention and to life post-16 are made, with chapters organized into three parts: conceptual overview of issues in learning and teaching, learning mathematics, and literacy development. The book is also united by the cohesive themes of assessment, evidence-based practice, and inclusive practices. *Educating Learners with Down Syndrome* importantly incorporates the voices of individuals with Down syndrome, whose personal narratives add significance to the research mission of the text and demonstrate the authors' inclusive philosophy. Aimed at researchers, teacher educators, higher degree students, and policy makers, this book is the first of its kind to provide a compendium of research on educating learners with Down syndrome.

Consuming Schools Trevor Norris 2011-01 The increasing prevalence of consumerism in contemporary society often equates happiness with the acquisition of material objects. *Consuming Schools* describes the impact of consumerism on politics and education and charts the increasing presence of commercialism in the educational sphere through an examination of issues such as school-business partnerships, advertising in schools, and corporate-sponsored curriculum. First linking the origins of consumerism to important political and philosophical thinkers, Trevor Norris goes on to closely examine the distinction between the public and the private sphere through the lens of twentieth-century intellectuals Hannah Arendt and Jean Baudrillard. Through Arendt's account of the human activities of labour, work, and action, and the ensuing eclipse of the public realm and Baudrillard's consideration of the visual character of consumerism, Norris examines how school commercialism has been critically engaged by in-class activities such as media literacy programs and educational policies regulating school-business partnerships.

Asian Popular Culture Anthony Y.H. Fung 2013-05-29 This book examines different aspects of Asian popular culture, including films, TV, music, comedy, folklore, cultural icons, the Internet and theme parks. It raises important questions such as – What are the implications of popularity of Asian popular culture for globalization? Do regional forces impede the globalizing of cultures? Or does the Asian popular culture flow act as a catalyst or conveying channel for cultural globalization? Does the globalization of culture pose a threat to local culture? It addresses two seemingly contradictory and yet parallel processes in the circulation of Asian popular culture: the interconnectedness between Asian popular culture and western culture in an era of cultural globalization that turns subjects such as Pokémon, Hip Hop or Cosmopolitan into truly global phenomena, and the local derivatives and versions of global culture that are necessarily disconnected from their origins in order to cater for the local market. It thereby presents a collective argument that, whilst local social formations, and patterns of consumption and participation in Asia are still very much dependent on global cultural developments and the phenomena of modernity, yet such dependence is often concretized, reshaped and distorted by the local media to cater for the local market.

Building Communities of Engaged Readers Teresa Cremin 2014-06-20 Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.
