A Student's Guide to Online Learning: Finding Success in Digital Study Gina May 2022-08-22 "This book is a treasure-trove of ideas, practical tips, and thoroughly sensible advice!" Dr Cora Beth Fraser, Associate Lecturer and Honorary Research Associate with The Open University "An essential guide for anyone considering online learning – whether wholly online or through blended learning." Natacha Harding, University of Winchester, UK "Gina May and Tim Bentley have written a must-read guide for anyone who is considering studying online." Yolanda De Iuliis, Student Support Worker, The Open University, researcher and host of podcast 'Conversations About Mithras' Online learning skills differ from those needed for face-to-face learning. A Student's Guide to Online Learning teaches you how to develop those skills through a range of advice, examples and practical exercises whether you are undertaking distance, wholly online or blended learning. Many students experience difficulties when dealing with the differences between learning in the traditional and digital environments. A key component of the successful completion of any online or blended course is confidence and enjoyment, this book enables you to have both. This book covers all you need to know for your online course, including: •How to develop an academic online persona •How to communicate in synchronous and asynchronous situations including tutorials and forums •Tips on confidently networking behind the computer screen •Advice on qualifications, career paths and employability skills Written by experienced academics who act as mentors throughout, A Student's Guide to Online Learning is an accessibly written, comprehensive, one-stop guide for students at all levels who are learning online in any capacity. Gina May is an Independent Course Provider; Associate Lecturer at the Open University and a Senior Fellow of the Higher Education Academy with a particular interest in online teaching and learning. Tim Bentley is an NHS Paramedic and Paramedic Educator responsible for mentoring student paramedics in their clinical education. He has a particular interest in and has championed and implemented Virtual Learning Environments and web

services.

Architectural Approach to Level Design Christopher W. Totten 2019-04-25 Written by a game developer and professor trained in architecture, An Architectural Approach to Level Design is one of the first books to integrate architectural and spatial design theory with the field of level design. It explores the principles of level design through the context and history of architecture. Now in its second edition, An Architectural Approach to Level Design presents architectural techniques and theories for you to use in your own work. The author connects architecture and level design in different ways that address the practical elements of how designers construct space and the experiential elements of how and why humans interact with that space. It also addresses industry issues like how to build interesting tutorial levels and how to use computer-generated level design systems without losing the player-focused design of handmade levels. Throughout the text, you will learn skills for spatial layout, evoking emotion through gamespaces, and creating better levels through architectural theory. FEATURES Presents case studies that offer insight on modern level design practices, methods, and tools Presents perspectives from industry designers, independent game developers, scientists, psychologists, and academics Explores how historical structures can teach us about good level design Shows how to use space to guide or elicit emotion from players Includes chapter exercises that encourage you to use principles from the chapter in digital prototypes, playtesting sessions, paper mock-ups, and design journals Bringing together topics in game design and architecture, this book helps you create better spaces for your games. Software independent, the book discusses tools and techniques that you can use in crafting your interactive worlds.

Gendering Classicism Ruth Hoberman 1997-01-01 Gendering Classicism explores the intersection of feminism, historical fiction, and modernism through the work of six writers, all of whom wrote historical novels set in ancient Greece or Rome: Naomi Mitchison, Mary Butts, Laura Riding, Phyllis Bentley, Bryher, and Mary Renault. As women gained access to

higher education in the late nineteenth century, they gained access also to the classical learning that had for so long demarcated and legitimated the British ruling classes. Steeped in misogyny, the classical tradition presented educated women with a massive project: the recasting of that tradition in terms that acknowledged the existence of women - as historical agents and interpreters of the historical past.
