The Secret of Water Masaru Emoto 2011-09-13 Dr. Masaru Emoto's stunning water-crystal photographs have enchanted millions of people in his many books. His groundbreaking work has shown that thoughts and words have a direct effect on water- crystal formation, and since our bodies are mostly water, our thoughts and words certainly affect not only ourselves but the world around us. In The Secret of Water, Dr. Emoto brings water's message of love, peace, and hope to the next generation in his first children's book. Entertaining and educational, this book offers an understanding of water that will encourage parents and children alike to value and give thanks to our most precious resource. In 2003 the United Nations proclaimed the years 2005 to 2015 as its International Water for Life Decade, which urges citizens of the world to take individual responsibility to learn all about water. In a time wrought with environmental catastrophes and natural disasters, The Secret of Water shows the necessity of protecting water and offers a message of hope and empowerment. Help us shift consciousness

Tuning the Student Mind Molly Beauregard 2020-06-01 How can we rethink teaching practices to include and engage the whole student? What would student experience look like if we integrated silence and feeling with empirical analysis? Tuning the Student Mind is the story of one teacher's attempt to answer these questions by creating an innovative college course that marries the spiritual and the theoretical, integrating meditation and self-reflection with more conventional academic curriculum. The book follows Molly Beauregard and her students on their intellectual and spiritual journey over the course of a semester in her class, "Consciousness, Creativity, and Identity." Interweaving personal stories, student writing, and Beauregard's responses, along with recommendations for further reading and a research appendix, it makes the case for the transformative power of consciousness-centered education. Written in a warm, engaging voice that reflects Beauregard's teaching style, Tuning the Student Mind provides an accessible, step-by-step template for other educators, while inviting readers more broadly to reconnect with the joy of learning in and beyond the classroom.

The Black Sun Stanton Marlan 2008-05-08 Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/86080> The black sun, an ages-old image of the darkness in individual lives and in life itself, has not been treated hospitably in the modern world. Modern psychology has seen darkness primarily as a negative force, something to move through and beyond, but it actually has an intrinsic importance to the human psyche. In this book, Jungian analyst Stanton Marlan reexamines the paradoxical image of the black sun and the meaning of darkness in Western culture. In the image of the black sun, Marlan finds the hint of a darkness that shines. He draws upon his clinical experiences—and on a wide range of literature and art, including Goethe's Faust, Dante's Inferno, the black art of Rothko and Reinhardt—to explore the influence of light and shadow on the fundamental structures of modern thought as well as the contemporary practice of analysis. He shows that the black sun accompanies not only the most negative of psychic experiences but also the most sublime, resonating with the mystical experience of negative theology, the Kabbalah, the Buddhist notions of the void, and the black light of the Sufi Mystics. An important contribution to the understanding of alchemical psychology, this book draws on a postmodern sensibility to develop an original understanding of the black sun. It offers insight into modernity, the act of imagination, and the work of analysis in understanding depression, trauma, and transformation of the soul. Marlan's original reflections help us to explore the unknown darkness conventionally called the Self. Stalking the Wild Pendulum Itzhak Bentov 1979

My Big Toe Thomas Campbell 2007-12-01 My Big TOE, written by a nuclear physicist in the language of contemporary Western culture, unifies science and philosophy, physics and metaphysics, mind and matter, purpose and meaning, the normal and the paranormal. The entirety of human experience (mind, body, and spirit) including both our objective and subjective worlds, are brought together under one seamless scientific understanding. If you have a logical, open, and inquisitive mind - an attitude of scientific pragmatism that appreciates the elegance of fundamental truth and the thrill of breakthrough - you will enjoy this journey of personal and scientific discovery. Based upon careful scientific research and logical deduction, this is a book for all who have an interest in the nature of the reality in which they exist. My Big TOE is not only about scientific theory, function, process, and discovery - but also speaks to each individual reader about their innate capabilities. Readers will learn to appreciate that their human potential stretches far beyond the limitations of the physical universe. This trilogy delivers the next major scientific conceptual breakthrough since relativity and quantum mechanics raised scientific eyebrows in the first half of the twentieth century. No catch, no megalomania, no hypothetical wackiness, no goofy beliefs, no unusual assumptions - just straightforward science that better describes the totality of our experience and provides a wealth of practical results and new understanding that can be applied personally and professionally by scientists and nonscientists alike. This is the real thing. My Big TOE is about life, purpose, personal significance, physics, evolution, and the reason why. The acronym "TOE" is a standard term in the physics community that stands for "Theory Of Everything." Such a theory has been the "Holy Grail" of physicists for more than fifty years. My Big TOE delivers the solution to that scientific quest at

the layman's level with precision and clarity. This book is an adventure into the overlapping worlds of science, philosophy, and metaphysics. It is tightly analytical and logical as all good works of science and philosophy should be, while at the same time down to earth, easily understandable, and full of good humor. No leaps of faith or beliefs of any sort are required to get to where these books will take you. Campbell did not put the "My" in My Big TOE to flaunt pride of authorship. Nor does the "My" indicate any lack of generality or applicability to others. The "My" was added to be a constant reminder to you that this reality model cannot serve as your personal Big TOE until it is based upon your personal experience. On the other hand, personal or subjective experience is only one piece of the reality puzzle. In the objective physical world of traditional science, My Big TOE delivers a comprehensive model of reality that subsumes modern science, describes our objective material reality, and is universally applicable. Contemporary physics is shown to be a special case of a more general set of basic principles. Physics is in the business of modeling reality. General Relativity, Quantum Mechanics, and currently String Theory have all unsuccessfully tried to produce an overarching model of our objective reality. In the physics community, these one-theory-explains-all reality models are called TOEs. This particular TOE is Big because it successfully integrates metaphysics and physics into a single unified big-picture view of our larger reality. The My Big TOE trilogy provides a rational, logically consistent Theory Of Everything, develops the required new paradigms to support that theory, constructs a solid scientific foundation for future explorations to be built upon, and explains the interfaces and connections between newly derived knowledge and the existing database of scientific and personal experience. It subsumes physics, redeems philosophy, and explains many objective as well as subjective phenomena. Within My Big TOE, the physical universe and consciousness are fully integrated into a single scientific, tightly logical exposition that encompasses the subjective as well as the objective, the normal as well as the paranormal, the whole of your experience body, mind, and spirit. The My Big TOE reality model will help you understand your life, your purpose, all of the reality you experience, how that reality works, and how you might interact most profitably with it. The author, in addition to his ongoing career in a traditional hard science, spent almost thirty years carefully researching altered states of consciousness both in and out of formal laboratory settings. With one foot in the world of physics and the other firmly planted in the scientific exploration of consciousness, Campbell is in a unique position to accomplish the synthesis required to bring all the disparate pieces of science together into a coherent scientific whole. My Big TOE is the result of this unusual dual career in both physics and parapsychology. Most readers find these books to be non-technical, lively, full of humor and good fun, as well as personally challenging and enlightening. The My Big TOE trilogy is hard hitting, personal, controversial, and full of new ways of viewing familiar things. It will make you laugh, wince, and reconsider what you thought you knew about almost everything. This book is guaranteed to annoy, anger, and offend some, as well as illuminate and emancipate others. It will turn your personal reality upside down and inside out as it unites mind, body, and spirit in one overarching scientific model. Our objective physical reality is shown to be just one piece of the larger puzzle of existence. This reality model provides a sound theoretical basis for understanding many of the scientific, technical, and philosophical enigmas that have been nagging at the minds of scientists and scholars for decades. Even more importantly, My Big TOE provides the scientific basis for finally answering many of the most unfathomable and pressing personal questions that have challenged human understanding since time immemorial since men and women first stared into a starlit sky and wondered who and why they were. After reading My Big TOE, one will understand both the universal and the personal (subjective) nature of consciousness, reality, and Big TOEs. One will learn to appreciate the fact that the larger reality extends beyond objective causality, beyond the reach of purely intellectual effort, into the personal subjective mind of each individual. The concepts in this book will initiate, and be the catalyst for, serious scientific and philosophical discussions in the fields of psychology, physics, philosophy, mathematics, evolution, and biology, as well as religion, theology, metaphysics, ontology, epistemology, and cosmology. The author chooses to first publish these ground breaking concepts in a trade publication rather than a technical journal because of their potential importance to every individual, and because the nature of the material (like Darwin's theory of evolution, for example) requires broad explanations spanning multiple academic disciplines. Because this material must develop entirely new scientific and reality paradigms, it requires a substantial intellectual and logical presentation to shed light upon the limitations of normal culturally habituated patterns of thought a goal that cannot be reached both quickly and effectively. This journey will take you to the beginning of time. It will dive deeply into the human heart as well as probe the limits of the human mind. My Big TOE will redefine the significance of you, and provide new meaning to your existence. It will help you realize and optimize your potential as well as provide you with a wholly new, fully integrated, scientific understanding of both your inside and outside world. My Big TOE, written by a scientist from a Western technological viewp

Destiny Matrix Jack Sarfatti 2002-11 A Different Cadence is a story about the people the author has encountered as clients, judges and witnesses. It is not a story about the lawyer but about the fascinating characters he has known and represented in more than thirty years of practice. There are pimps, whores, gamblers and killers. There are witches and mental patients in chains. There are judges who take the time to care; the murder of Rocky and Curly. James Parks on trial for killing his wife's lover; a gambler's trial; and two young men accused of statutory rape on trial for their lives. It tells the story of a retired Army sergeant, locked away in St. Elizabeths Mental Hospital without due process of law. Then there is death on Grapevine Mountain, which remains a mystery today. Some are innocent, ground up in the machinery of the system. Others are not so innocent. Guilty or innocent, their stories are fascinating. This book illustrates the contrast in the legal profession of yesterday, when lawyers represented people and their problems, as opposed to today's practice with mega firms and the emphasis on the 'Billable Hour.'

The Ouroboros Code Alex M. Vikoulov 2019-10-10 Will the abyss between mind and matter ever be bridged? How can configurations of matter ever give rise to consciousness? This is the greatest enigma that puzzles the scientific world, also known as "the hard problem." How do the objective and subjective dimensions relate to each other? It is here that scientists and spiritual seekers appear irreconcilable. Yet the number of scientists calling into question the hegemony of reductive materialism is steadily on the rise. As Artificial Intelligence, Nanotechnology and Transhumanism make us rapidly approach the era of the Technological Singularity, the borders between the physical and the metaphysical appear to fade into oblivion, by virtue of the all-encompassing umbrella of Information Technology. Indeed, to wonder whether we might be living in a kind of computer simulation has become a legitimate question. It is exactly here, that the building blocks for the bridge between science and spirituality might be found. What if our reality experience is the product of a code? Could such a code provide a subjective experience? What are the characteristics of such a code? Embark on a mind-boggling quest into this deepest alchemical secret. Prepare yourself for a Tsunami of mind-altering concepts. Let yourself be drawn into the vortex of the Pansentience hypothesis. Learn how reality may digitally self-simulate by becoming the map and the territory simultaneously. And let yourself be seduced by Eris' apple of confusion to transcend your inner strife. As you bite in your own tail, you will discover, you are no one else than the mighty Ouroboros. Discover how Yoneda's Lemma shows us that material manifestations are mere fossils of sensing. Sail through the perilous uncharted seas of the unknown, such as AI hermeneutics, where intelligence has not found ways yet to map safe maritime routes and routines. And examine for yourself in the light of evidence from entropy, information, algorithms and pattern recognition, whether this voyage into the realm of Consciousness will guide you to be wrecked in woo or to be docked in the harbor of wisdom. This forbidden fruit is the gateway to the Eschaton, the luminous Omega Hypercomputer at the end of time. The guide to the non-dual essence of being. This is the recipe to perform the Magnum Opus. The recursive self-modifying Ouroboros code to experience the ecstasy of Kundalini's Techno-transcendentalism, where All is One and we are God. A must read for scientific spiritualists and spiritual scientists.

The Secret Life of Water Masaru Emoto 2011-07-05 From its arrival on earth to the vast areas it traverses before emptying into the sea, water holds all the knowledge and experience it has acquired. As phenomenal as it may seem, water carries its whole history, just as we carry ours. It carries secrets, too. In The Secret Life of Water, bestselling author Masaru Emoto guides us along water's remarkable journey through our planet and continues his work to reveal water's secret life to humankind. He shows how we can apply its wisdom to our own lives, and how, by learning to respect and appreciate water, we can better confront the challenges that face the twenty-first century—and rejuvenate the planet.

The Universe in Black and White Terry Favour 2012-09-01 Have you ever tried to wrap your head around quantum physics? Have you ever tried to comprehend concepts of time and space that have been popularized by the promoters of the "new physics" and various eastern teachers? If you have, chances are either that your eyes glazed over or you felt as if your head might explode at any moment. Here for the first time, the concepts that have been propounded by the great thinkers and teachers of the twentieth century are made accessible in an illustrated guide. More importantly, this material is presented in a way that is non-threatening and fun. Using simple and delightful illustrations throughout, Favour, explores: The paradigm shift that has occurred, whether we are ready or not. How quantum physics and the new technology has challenged our experience of time and space. How the spiritual thought of East and West have melded. The relationship of self to oneness, of form to emptiness.

A Theory of Everything Ken Wilber 2001-10-16 Here is a concise, comprehensive overview of Wilber's revolutionary thought and its application in today's world. In A Theory of Everything, Wilber uses clear, nontechnical language to present complex, cutting-edge theories that integrate the realms of body, mind, soul, and spirit. He then demonstrates how these theories and models can be applied to real-world problems in areas such as politics, medicine, business, education, and the environment. Wilber also discusses daily practices that readers take up in order to apply this integrative vision to their own everyday lives.

Hallucinations André Aleman 2008 Hearing voices when nobody speaks or seeing objects no one else sees'hallucinations are intriguing phenomena that have puzzled clinicians, researchers, and lay people alike for centuries. In this book, authors Andr? Aleman and Frank Lar'i review the latest research on the cognitive and neural bases of hallucinations and outline their unique neurobiology by drawing on evidence from brain imaging and neurotransmission studies. Detailed attention is paid to hallucination characteristics in different forms of psychosis as well as other clinical groups and

conditions, such as brain damage, Charles Bonnet syndrome, dementia, and chemical substance abuse. The authors integrate the wealth of recent findings into a cohesive framework and put forward a comprehensive, multicomponent model of hallucinations. Finally, treatment of hallucinations is discussed, ranging from pharmacotherapy and cognitive therapy to transcranial magnetic stimulation. A comprehensive list of available hallucination questionnaires and scales is also included as a handy clinical assessment resource.

Beyond Artificial Intelligence Alain Cardon 2018-11-06 This book will present a complete modeling of the human psychic system that allows to generate the thoughts in a strictly organizational approach that mixes a rising and falling approach. The model will present the architecture of the psychic system that can generate sensations and thoughts, showing how one can feel thoughts. The model developed into an organizational architecture based on massive multiagent systems. The architecture will be fully developed, showing how an artificial system can be endowed with consciousness and intentionally generate thoughts and, especially, feel them. These results are multidisciplinary, combining both psychology and computer science disciplines.

Analysis and Assessment of Gateway Process The Us Army 1983 "You are not thinking, you are merely being logical." -Niels Bohr, Danish physicist and Nobel Laureate Analysis and Assessment of Gateway Process is a document prepared in 1983 by the US Army. This document was declassified by the CIA in 2003. This brief report focuses on the so-called "Gateway Experience," a training program originally designed by the Monroe Institute, a Virginia-based institute for the study of human consciousness. The Gateway experience uses sound tapes to manipulate brainwaves with a goal of creating an altered state of consciousness, which includes out-of-body experiences, energy healing, remote viewing, and time travel. The report concluded that the Gateway Experience is 'plausible' in terms of physical science, and that while more research was needed, it could have practical uses in US intelligence. Students of US intelligence, and anyone interested in the cross-roads between consciousness and reality will find this report fascinating reading.

The Book of Telling 2008-01-01 Sharona Ben-Tov Muir discovered after the death of her father, inventor and New Age guru Itzhak Bentov, that he had created Israel's first rocket. A secret group of scientists working in a rooftop shed, the "Science Corps," of which he was a part, invented weapons during Israel's war of independence and later developed Israel's nuclear resources and other major scientific projects. Bentov, however, settled in Boston and made his fortune with such medical inventions as a cardiac catheter, which he created in his home laboratory, where Muir played as a child. Haunted by the question of why her father had never discussed his past, Muir traveled to Israel to find the Corps. Through her own memories and the memories they share, Muir comes to know the brilliant, impassioned, and creative young Bentov as he demonstrates his latest invention for her, takes her canoeing, and reveals his thoughts about consciousness and the cosmos. Muir elegantly evokes the hubbub of Jerusalem streets, the wartime adventures of her hosts, and the inner lives of Israelis. The resulting story of invention and self-invention, of the Corps's wartime

experience as told for the first time, and of a deep, abiding love between father and daughter is an incandescent memoir. The author provides a new preface for this new Bison Books edition.

Chaos, Creativity, and Cosmic Consciousness Rupert Sheldrake 2001-11-01 Three of the most original thinkers of our time explore issues that call into question our current views of reality, morality, and the nature of life. • A wide-ranging investigation of the ecology of inner and outer space, the role of chaos theory in the dynamics of human creation, and the rediscovery of traditional wisdom. In this book of "dialogues," the late psychedelic visionary and shamanologist Terence McKenna, acclaimed biologist and originator of the morphogenetic fields theory Rupert Sheldrake, and mathematician and chaos theory scientist Ralph Abraham explore the relationships between chaos and creativity and their connection to cosmic consciousness. Their observations call into question our current views of reality, morality, and the nature of life in the universe. The authors challenge the reader to the deepest levels of thought with wide-ranging investigations of the ecology of inner and outer space, the role of chaos in the dynamics of human creation, and the resacralization of the world. Among the provocative questions the authors raise are: Is Armageddon a self-fulfilling prophecy? Are we humans the imaginers or the imagined? Are the eternal laws of nature still evolving? What is the connection between physical light and the light of consciousness? Part ceremony, part old-fashioned intellectual discussion, these dialogues are an invitation to a new understanding of what Jean Houston calls "the dreamscapes of our everyday waking life."

The Divine Pymander Hermes Mercurius Trismegistus 2019-01-08 In this Book, though so very old, is contained more true knowledge of God and Nature, than in all the Books in the World besides, except only Sacred Writ; And they that shall judiciously read it, and rightly understand it, may well be excused from reading many Books; the Authors of which, pretend so much to the knowledge of the Creator, and Creation. If God ever appeared in any man, he appeared in him, as it appears by this Book. That a man who had not the benefit of his Ancestors' knowledge, being as I said before, The first inventor of the Art of Communicating Knowledge to Posterity by writing, should be so high a Divine, and so deep a Philosopher, seems to be a thing more of God than of Man; and therefore it was the opinion of some That he came from Heaven, not born upon Earth [Goropius Becanus]. There is contained in this Book, that true Philosophy, without which, it is impossible ever to attain to the height, and exactness of Piety, and Religion. According to this Philosophy, I call him a Philosopher, that shall learn and study the things that are, and how they are ordered, and governed, and by whom, and for what cause, or to what end; and he that doth so, will acknowledge thanks to, and admire the Omnipotent Creator, Preserver, and Director of all these things. And he that shall be thus truly thankful, may truly be called Pious and Religious: and he that is Religious, shall more and more know where and what the Truth is: And learning that, he shall yet be more and more Religious. The glory and splendour of Philosophy, is an endeavoring to understand the chief Good, as the Fountain of all Good: Now how can we come near to, or find out the Fountain, but by making use of the Streams as a conduct to it? The operations of Nature, are Streams running from the Fountain of Good, which is God. I am not of the ignorant, and foolish opinion of those that say, The greatest Philosophers are the greatest Atheists: as if to know the works of God, and to understand his goings forth in the Way of Nature, must necessitate a man to deny God. The Scripture disapproves of this as a sottish tenet, and experience contradicts it: For behold! Here is the greatest Philosopher, and therefore the greatest Divine.

Neurotheology Andrew Newberg 2018-03-27 Religion is often cast in opposition to science. Yet both are deeply rooted in the inner workings of the human brain. With the advent of the modern cognitive neurosciences, the scientific study of religious and spiritual phenomena has become far more sophisticated and wide-ranging. What might brain scans of people in prayer, in meditation, or under the influence of psychoactive substances teach us about religious and spiritual beliefs? Are religion and spirituality reducible to neurological processes, or might there be aspects that, at least for now, transcend scientific claims? In this book, Andrew Newberg explores the latest findings of neurotheology, the multidisciplinary field linking neuroscience with religious and spiritual phenomena. He investigates some of the most controversial—and potentially transformative—implications of a neurotheological approach for the truth claims of religion and our understanding of minds and brains. Newberg leads readers on a tour through key intersections of neuroscience and theology, including the potential evolutionary basis of religion; the psychology of religion, including mental health and brain pathology; the neuroscience of myths, rituals, and mystical experiences; how studies of altered states of consciousness shed new light on the mind-brain relationship; and what neurotheology can tell us about free will. When brain science and religious experience are considered together in an integrated approach, Newberg shows, we might come closer to a fuller understanding of the deepest questions.
